

Large Format Porcelain Tile CEU Course

Course Title: Large Format Porcelain Tile

Course Number: MAP013

Description: An explanation about the “calibration specifications” that are followed when porcelain tile is manufactured; how the quality, variety of sizes, and intended use of the porcelain tile can affect the installation method; and the importance of surface preparation as the size of the porcelain tile increases. The presentation also covers how the grout joint size and the mortar type used can affect the performance of a large-format porcelain tile installation; and how an installation can be influenced by curvature, thermal movement, deformability and use of expansion joints.

Learning Units: 1 LU & 1 HSW Credit

Delivery Provider Name: ProSpec, LLC[®]

Credit Designation: LU & HSW

Course Format: Instructor-Led-Face-To-Face

Contact Us: info@prospecllc.com

Learning Objective 1: Participants will learn about the “calibration standards” that are followed when manufacturing porcelain tile

Learning Objective 2: Understanding of how the quality, variety of sizes, and intended use of the porcelain tile can affect the installation method

Learning Objective 3: Discussion of the importance of surface preparation as the size of the porcelain tile increases

Learning Objective 4: Understanding that both grout joint size and type of mortar used can affect the performance of a large format porcelain tile installation

Learning Objective 5: How the effects of Curvature, Thermal movement, Deformability, and use of Expansion Joints can influence your installation
