

General Surface Prep CEU Course

Course Title: General Surface Preparation

Course Number: MAP005

Description: An explanation of industry standards and guidelines regarding substrate preparation for installation of concrete-based underlayments and toppings. These may be finished floor systems (toppings) or be part of a system prior to subsequent installations of ceramic, resilient, VCT or other finished floor installations. Participants will be exposed to the correct process of inspecting a substrate to determine required preparation (repairs), moisture vapor emission analysis and testing methods, and methods of mechanical preparation prior to the installation of an underlayment or topping

Learning Units: 1

Delivery Provider Name: ProSpec, LLC[®]

Credit Designation: LU

Course Format: Instructor-Led-Face-To-Face

Contact Us: info@prospecllc.com

Learning Objective 1: Show industry standards and guidelines regarding substrate preparation.

Learning Objective 2: Identify typical modes of failure and testing methods.

Learning Objective 3: Understand surface-preparation guidelines and the equipment used to prepare a substrate.

Learning Objective 4: Understand the necessity of additional preparation methods such as waterproofing, crack-isolation and sound-control membranes.
